Block 41 Lot 2 Palmera Springs 2 Caloocan CIty | 1700 Sandejas St. San Isidro Pasay City

SKILLS

General Skills: Web Development, Machine Learning, Natural Language Processing, ETL Automation, Data Visualization & Analytics, Web Scraping, Data Warehousing

Technical Skills: HTML, CSS, Bootstrap, TailwindCSS, Javascript (NodeJS, React), Python (Pandas, Matplotlib, NLTK, SkLearn, Selenium), Power BI & MS Excel, MySQL, MongoDB

Tools: Git, Visual Studio Code, Jupyter Notebook, Anaconda, Postman

EXPERIENCE

IT Intern   **Feb 2023 – Jun 2023**

Accenture, Inc.
- Performed Data Cleaning and Transformation on ServiceNow Incident Tickets and created a Power BI Dashboard to report and visualize the data to team lead.
- Updated Datadog Script and created a new branch to push commits and pull requests to azure devops.
- Traced Accenture Cybergate 2 and Accenture Global One access switch, hostname, mac address, and access points using Cisco Commands and terminal emulator PuTTY
- Performed remote troubleshooting with assigned buddy using LogMeIn Rescue Software to gain access to client workstation

PROJECTS

An Analytics Approach using Sentiment Analysis to Understand Customer Feedback | *Python, NLTK, Pandas, Power BI, Selenium, Sk-Learn*   **Jan 2022 – Dec 2022**
- Developed an automated Natural Language Processing (NLP) Model that categorizes and classifies customer sentiments as positive, negative, and neutral using Python, NLTK, and supervised machine learning algorithms.
- Performed ETL automation using Python and Pandas.
- Created an automated Power BI Dashboard with snowflake schema
- Performed Web Scraping using Selenium to scrape and extract the data from an online shopping platform

PureLife Medical Clinic: An Online Appointment Booking System | *NodeJS, React, MySQL, Postman, Git*   **Jan 2023 – Mar 2023**
- Developed a full-stack web application using NodeJS serving a REST API with React as the frontend and MySQL as database.
- Created a responsive web application using SASS for styling.

Lumen High School Blackboard | *NodeJS, EJS, Bootstrap, Git, Figma*   **May 2022 – Jul 2022**
- Developed a full-stack web application using NodeJS, Express JS as REST API with EJS as a template system, bootstrap for frontend design and MySQL as database.
- Converted the UI design in figma into an actual working responsive web application with Bootstrap CSS.

EDUCATION

University of Santo Tomas   *Aug. 2019 – Jun. 2023*

Bachelor of Science in Information Systems (Cum Laude)
